

Steps to test login, activating Authenticator, changing password and store backup codes.

1. Go to our website, www.atlasmtt.net
2. Scroll down to the Login Form
3. Enter your **username** and **password** and press **Login**

4. The following screen pops up.

5. If you only see the top section, then scroll down and you will see the option to add (and activate) a new verification code for your mobile app Authenticator.

Then click on the button **+ Add a new Verification Code**

A screen with QR code will appear like this below.

Add a Multi-factor Authentication Method

Title

You and the site administrators will see this name in the list of available Multi-factor Authentication methods for your user account. Please do not include any sensitive or personally identifiable information.

Make this the default Multi-factor Authentication method

Set up your verification code (also known as an "authenticator code") using the information below. You can use an authenticator app (such as Google Authenticator, Authy, LastPass Authenticator, etc), your favourite password manager (1Password, BitWarden, Keeper, KeePassXC, Strongbox, etc) or, in some cases, your browser.

Authenticator app setup

Use one of the following alternative methods to set up the verification code in your authenticator application, password manager or browser.

Enter this key JM [REDACTED] #FG

Scan or right click / long tap this QR code

Click this link [Set up your verification code](#)
Only works on supported browsers, e.g. Safari.

Enter the six digit verification code

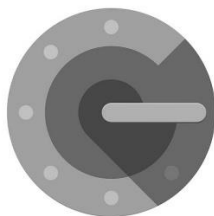

Six Digit Code

Login Form

Hi Demo User,

Following steps are performed on your mobile smart phone!

- Users can use various apps, a popular one being **Google Authenticator** or **Microsoft Authenticator**. These are available as a free download for Android and Apple devices. Install the app on your smartphone.

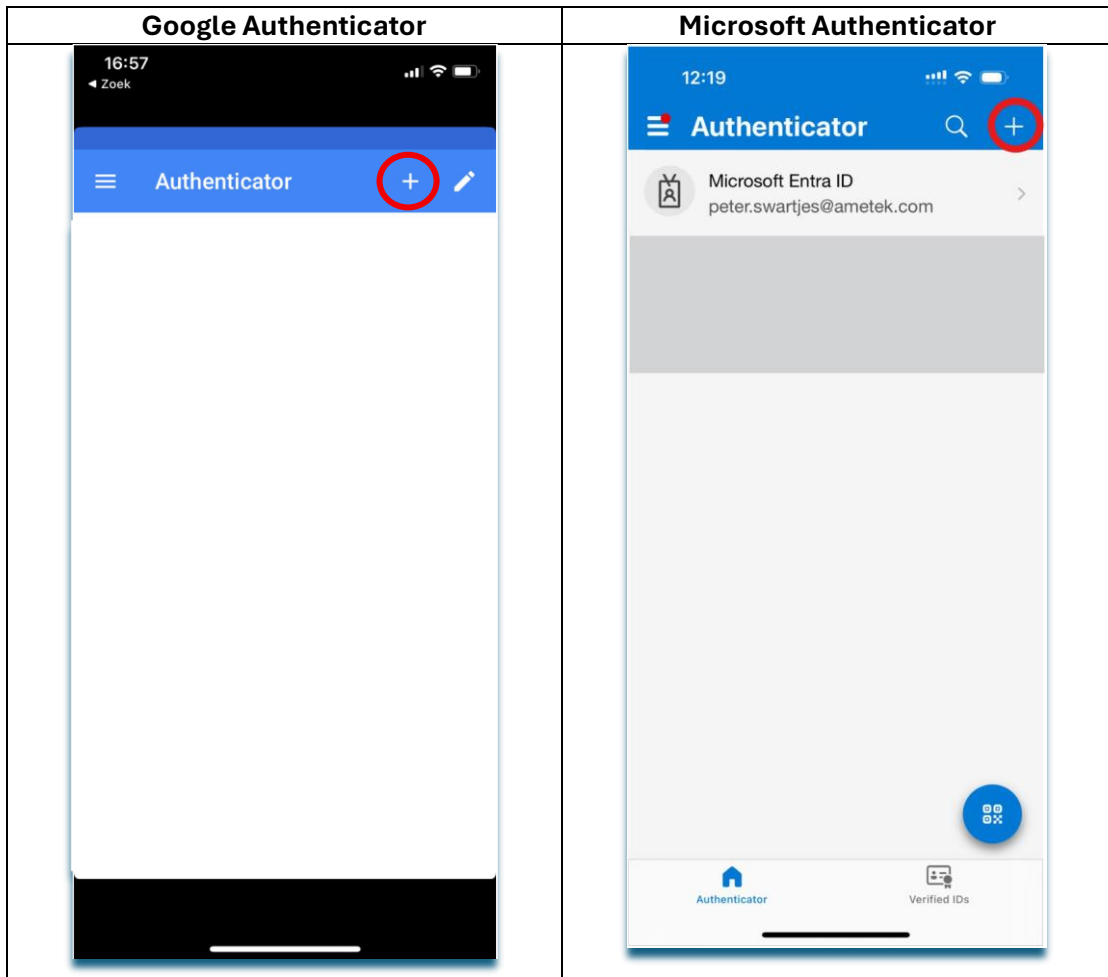

Google (old icon)

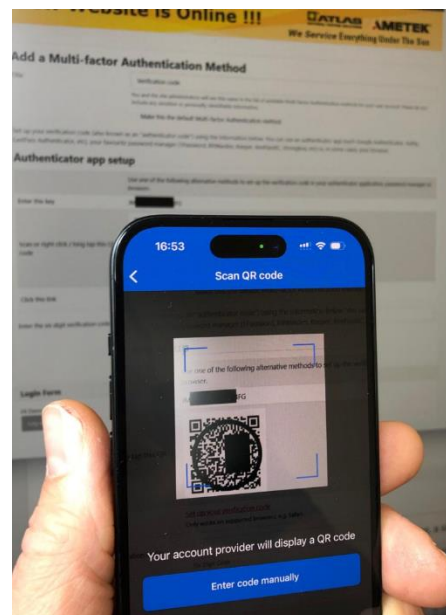

Google (new icon)

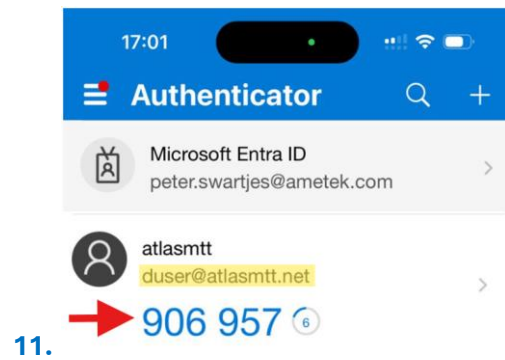

Microsoft (icon)

- Use the **+ button** on top in the Google or Microsoft Authenticator to add a new Account.

- Microsoft Authenticator:** Use **Other** and the camera on phone will get activated.
Google Authenticator: Use **Scan QR code** and the camera on phone will get activated
- Scan the **QR code** displayed on ATLAS IST website (see step 5 of this instruction).
- When the QR code is properly in front of the camera, almost immediately the new account has been created named **atlasmtt** on your mobile phone.
 You will see a 6 digit code and underneath the account name: **<username>@atlasmtt.net**

11.

Following steps are performed on the ATLAS IST website!

12. Enter this six-digit code on the website and click the **Save** button.
From now on, MFA is successfully activated, and the user must log in with the MFA code every time to access the website.

NOTE: The above activation procedure is done only once!

Continue on next page to change your password

Changing your Password for the ATLAS IST service website

13. In case you are also requested to change your password, the following screen will appear. It only takes 3 steps to change your password here as indicated by arrows.

Please do not change anything else on this page!

The screenshot shows the ATLAS AMETEK website header with navigation menus and a search bar. A yellow banner reads "New Website is Online !!!". A notification box at the top states "You are required to reset your password before proceeding." The "Edit Your Profile" section contains fields for Name (Demo User), Username (duser), Password, and Confirm Password. Red arrows and circles 1 and 2 point to the Password and Confirm Password fields respectively. Below this is the "Basic Settings" section with dropdown menus for Editor, Time Zone, Frontend Language, and Dark Mode. The "Multi-factor Authentication" section shows it is enabled with a "Turn Off" button. The "Backup Codes" section includes a "Print these codes" button and a list of codes. The "Verification code" section shows a current code of 123 456 and a "Default" button. The "Code by Email" section has a "+ Add a new Code by Email" button, which is circled with a red arrow and circle 3. At the bottom, there are "Save" and "Cancel" buttons, and a "Login Form" section with a "Log out" button.

The following screen will pop up, informing you the update of your profile has been saved.

Login Form

Hi Demo User,

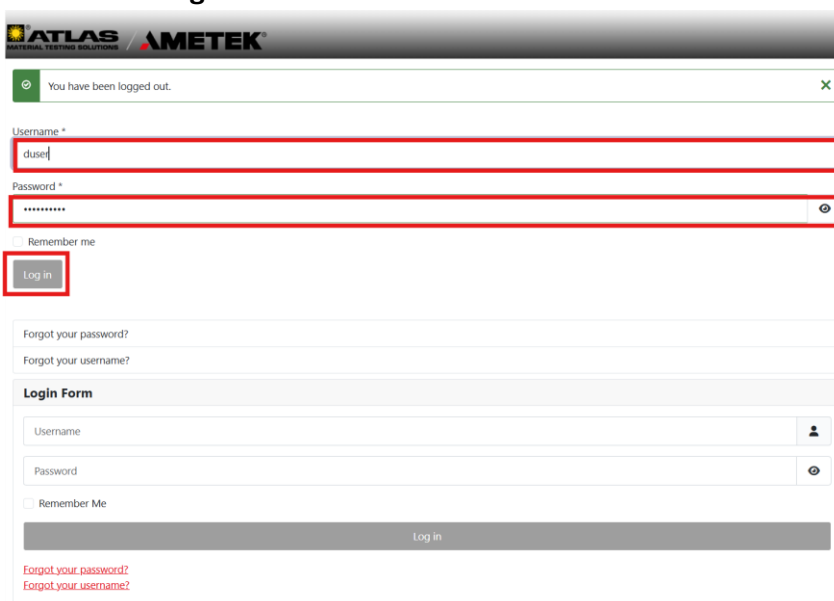

[Log out](#)

Proceed with the next steps to store Backup Codes

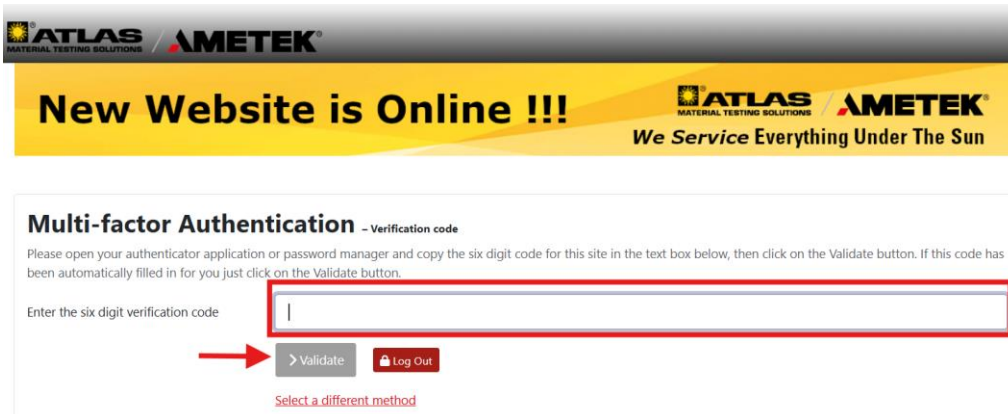

14. Logout from the above screen.

15. And when the following screen appears, please enter your **login credentials** again (but now with the NEW password just entered in previous steps). And use the **Log In** button.

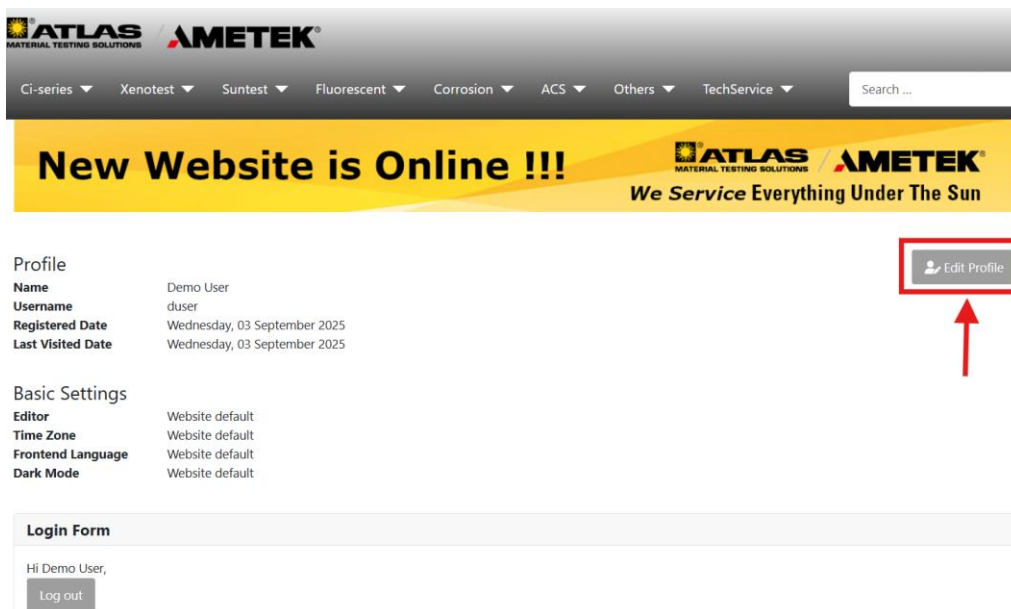

- 16. This screen will appear where you are asked to enter the 6-digit code as appearing on your mobile phone using the Authenticator with the Authenticator account (named: <username>@atlasmtt.net) used in previous step #10

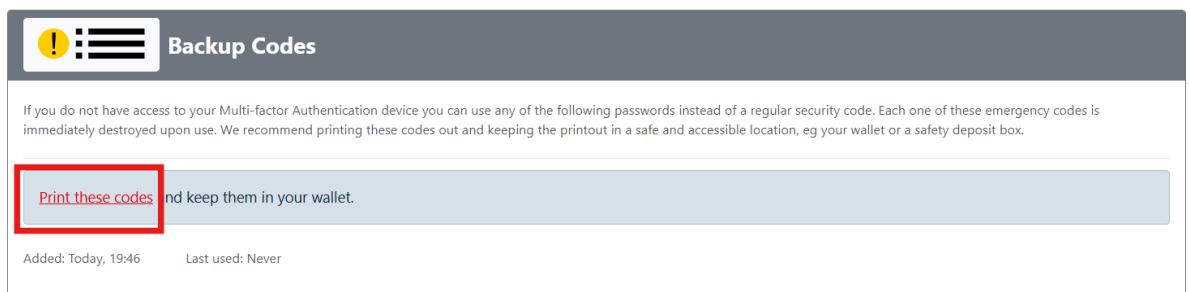

Enter this code from your phone on the screen and press <enter> or click verify.

- 17. The next screen will appear, and you need to select the button **Edit Profile**

- 18. This will pop up the same screen as in step #13
Now you need to copy the backup codes using the hyperlink under **Print these codes**

19. This will bring you to a screen like this with various “codes”

ATLAS MATERIAL TESTING SOLUTIONS **AMETEK**

Backup Codes

If you do not have access to your Multi-factor Authentication device you can use any of the following passwords instead of a regular security code. Each one of these emergency codes is immediately destroyed upon use. We recommend printing these codes out and keeping the printout in a safe and accessible location, eg your wallet or a safety deposit box.

42013018	10094705
37815818	21977596
13392521	60048550
59220266	92028761
85306935	68655561

Use the button below to generate a new set of Backup Codes. We recommend that you do this if you think your Backup Codes are compromised, e.g. someone got hold of a printout with them, or if you are running low on available Backup Codes.

Login Form

Hi Demo User,

20. Select all codes with your mouse cursor to copy them to a notepad file or make a screenshot to print them to have them available if you want to access the website but have no access to your mobile phone with the Authenticator and your account on it. You can use the RED button to **Regenerate Backup Codes**

21. Now all is complete, and you can Logout again

22. And you can try again to login and you should see besides username and password (that you now also can checkmark with “Remember Me”)

ATLAS MATERIAL TESTING SOLUTIONS **AMETEK**

You have been logged out.

Welcome to the ATLAS International Service Team website.

Sep. 1, 2025
 Welcome to the New ATLAS International Service Team Website.
 We hope you enjoy the new design and functionality of the new website.
 In case you do find erroneous hyperlinks, please report them, either to Torsten, or to me in order to fix those errors.
 In case you are facing any difficulties to login, please let me know.

Best regards,
 Torsten and Peter

Remember Me

[Forgot your password?](#)
[Forgot your username?](#)

23. Then your request for the 6-digit Authenticator code will appear again.

The screenshot shows the ATLAS AMETEK website header with a yellow banner that reads "New Website is Online !!!" and "We Service Everything Under The Sun". Below the banner is a "Multi-factor Authentication - Verification code" section. It contains a text box for entering a six-digit verification code, a "Validate" button, a "Log Out" button, and a link that says "Select a different method".

24. But here you also can use the “select a different method”.

The screenshot shows a "Select a Multi-factor Authentication method" form. It has a title and a subtitle: "Please select how you would like to verify your login to this site." There are two options: "Verification code" with a text box containing "123 456" and "Backup Codes" with a warning icon and a menu icon. The "Backup Codes" option is highlighted with a red box.

25. Choose this time for the **Backup Codes** to check if those are working correctly.

The screenshot shows a "Multi-factor Authentication - Backup Codes" form. It contains a text box for entering a backup code, which has "42013018" entered. Below the text box are "Validate" and "Log Out" buttons. A red arrow points to the "Validate" button. A link below the buttons says "Select a different method".

26. And YES, you logged in correctly, even **without using the mobile Authenticator app.**

Welcome to the ATLAS International Service Team website.
